

Environmental Harmonization: Sage Won't Do It Anymore

Maggie & Nigel Percy of Sixth Sense Consulting, Inc.

Since the latter half of 2007, we have consistently met with complex, hazardous and hard to resolve energy issues on people's properties. This is a dramatic change from our experience in the previous 9+ years of doing space clearings. Whereas in the past, most energies responded to routine methods of clearing, in recent months, we have repeatedly encountered stubborn, challenging and even dangerous energies. For example, we have continued to work with a client since August to get her property clear of noxious energy, but have not yet succeeded, although it is greatly improved. Another instance involved a curse energy that menaced me with death (the client confirmed that others who had tried to clear the curse had been physically harmed). More recently, a client with whom we have worked in the past had us clear her property, and somehow I became linked with the energy and it made me very ill for several days. In February of 2008, we worked with a property that had seriously disharmonious energy. We were unable to save the life of a beloved pet on that property, who died as a result of the noxious energies.

Considering what brief exposure to these energies can do to us, and we don't live with them, think about what they are doing to YOU. We have had clients who had major health, financial and relationship issues that were related to their environment. While not everything that is 'wrong' in your life is due to noxious environmental energy, you might be surprised at how much your environment is contributing to your problems, especially to problems that are not responsive to other treatments.

Why have things gotten so bad?

We have a theory. In our experience, which is vast, we have noted that any major change actually begins BEFORE the visible event itself. We feel that the changes we have noted in environmental energies reflect the energy of the year 2012. It is not that far off, and it represents a major shift of energy. We feel we have entered into a sort of transitional energy zone that is characterized by chaos and challenge. We believe that the increase in entities, discarnates, curses and other challenging forms of noxious energy are just a reflection of the overall imbalance due to the coming major shift. As such, it is planet-wide and can affect everyone. And it will continue to do so for years!

We are experts at harmonizing all types of energies. We have vast experience, and accumulate more all the time. Maybe in the past you felt fine using a sage wand or saying a prayer to clear your property. That isn't enough anymore in most cases. Even clients we have worked with who have done rigorous clearing work using a variety of methods have not been able to clear everything. ***The really creepy stuff does not respond to traditional methods.*** You need to have your space professionally cleared on a regular basis, at least twice a year (but three times a year is better). If you don't do that, you are putting yourself and your family and your way of life at risk. You also will make our job a lot harder when you finally come to us for help if you wait too long.

We have devised a win/win solution to this troubling problem. We offer regular, discounted rates on space clearings. If you want to save money, you can learn how to do it yourself. Equip yourself with knowledge! Take our courses. Buy our ebook. Attend our teleseminars on Environmental Harmonization.
